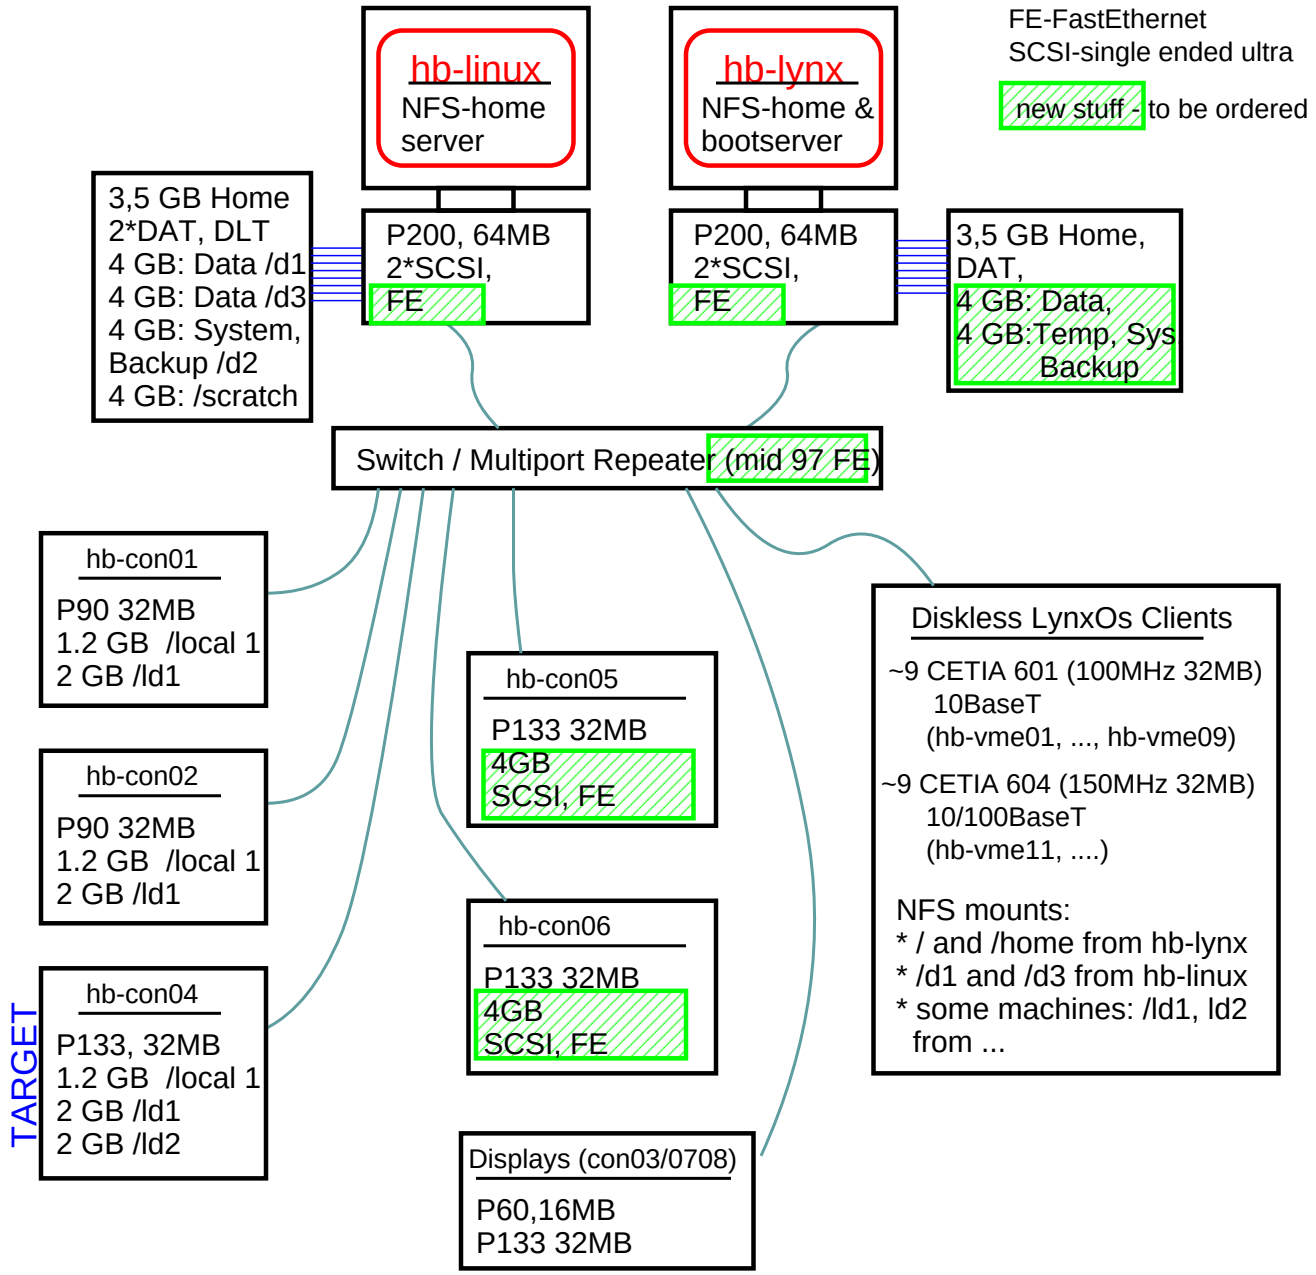
HERA-B LINUX/LynxOs Online NFS-cluster 97

HH 11-3-97

K.Ehret:hb-con's:~ehret/pic/linux_97

Setup after upgrade on 6. to 11. march 1997



NFS-mount table:
* /home for all Linux machines besides LynxOs server (mounted from hb-linux:/home)
* /Home for all LynxOs machines (601 and 604) (mounted from hb-lynx:/home/Lynx/C604/Home)
  -> Lynx home dirs may be accesed from linux under /home/Lynx/C604/Home
* /d1 and /d3 for all Linux (besides LynxOs server) and LynxOs machines (mounted from hb-linux)
* from hb-con04 the local disks /ld1 and /ld2 are exported and mounted from: hb-vme01 and 03

Passwd:
* the reference passwd file is kept on the hb-linux server, so please change your password only on this machine:
  - for the linux side an automized update procedure exists
  - for lynx this will come up some time

* please request if you need access to some local data disks
  but: crossmounting should be avoided
* Usage of RAID array is under discussion.
* We intend to install the first stage of the fast ethernet infrastructure latest until mid 97
